1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams, who shows a contour cutter with all of the recited limitations including a first cutter (34) for cutting an apex, and a second cutter (36) for cutting a side. The tools cut successively due to their angled progression best seen in figure 8.

3. Claims 7-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson et al. who shows a contour cutter with all of the recited limitations including a first cutter (138) for cutting an apex, a second cutter (32) for cutting one side, and a third punch (34) for cutting another side. Peterson also shows a support (28) for supporting the workpiece. The tools are capable of being driven in succession, due to their independent drive mechanisms.

The claims break down each cutter into numerous contiguous portions. Of course, each of Peterson's blades has numerous contiguous portions, even if all of said portions are the same. Since Applicant never recited in the claims the structure of each portion (such as straight or curved), the claims are quite broad and readable on Peterson.

4. Applicant's arguments have been fully considered but they are not persuasive.

Applicant argues that neither Williams nor Peterson show the first cutter cutting both the apex and a fraction of a side extending from the apex. The problem is that Applicant's claims do not define that the first cutter has a straight section. Below is a graphic that shows how Williams, for example, reads on claim 7.

Since none of Applicant's claims specify that the fraction F is straight, nor even that the side as a whole is straight, then it follows that William's portion F , as shown above, reads on Fraction F of Applicant's claims. Peterson reads on Applicant's claims in a similar manner. To distinguish over the likes of Peterson and Williams, all Applicant

needs to do is recite in the claims that the first cutter has a straight section for cutting the fraction F.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday-Thursday, 7:30-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached at 703-308-1082.

All responses are encouraged to be by fax at 703-872-9306. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
